EDUCATION		
<b>Pace University, Seidenberg School of Computer Science, and Information Systems   GPA: 3.70 / 4.00</b> Master of Science (MS) in Computer Science <i>Coursework: • Deep Learning • Game Programming • Mobile &amp; Web Dev • Java • Algorithms &amp; Computing • DBMS • Computer Systems • Internet Computing • Parallel Computing • Artificial Intelligence</i>		New York, NY September 2022 - May 2024
<b>University of Mumbai, School of Engineering   Honors: Summa Cum Laude   GPA: 7.25 / 10</b> Bachelor of Science (BS) in Electronics and Telecommunication Engineering		Mumbai, India August 2012 - May 2016
PROFESSIONAL EXPERIENCE		
<b>User Experience (UX) Designer, Crossignz, NY, United States</b>		April 2024 – April 2023
<ul style="list-style-type: none"> <li>Competed in one day hackathon focused on creating AI solutions and secured 3rd place out of 25 teams, demonstrating teamwork and AI development</li> <li>Collaborated with a team of 4 developers and designers in designing a prototype content using Figma for a Service skills exchange application</li> </ul>		
<b>Artificial Intelligence - Machine Learning Intern, Keeper AI Inc., NY, United States</b>		October 2023 – December 2023
<ul style="list-style-type: none"> <li>Implemented a novel approach using natural language processing techniques to improve existing model accuracy by 90%</li> <li>Facilitated data collection, preprocessing, and exploratory analysis to support development of AI models for user-facing products under guidance of mentors</li> </ul>		
<b>UI/UX Frontend Software Developer Intern, Shop Taki, NY, United States</b>		June 2023 – September 2023
<ul style="list-style-type: none"> <li>Designed and prototyped android medical app, with intuitive information architecture, user flows, and low/high-fidelity wireframes for 10+ key features like symptoms tracking using Figma, based on research insights</li> <li>Collaborated closely with engineering teams to ensure faithful implementation of designed experiences, providing design specs, assets and guidance on Java/Android development best practices</li> <li>Led the UI team in establishing a design system, wireframes by leveraging Figma for prototyping and design tools with Locofy.AI</li> </ul>		
<b>Senior Software Frontend Developer, Infosys Ltd, Pune, Maharashtra, India</b>		February 2022 – July 2022
<ul style="list-style-type: none"> <li>Communicated with clients and analyzed business requirements to seek clarification on the product design through presentations</li> <li>Developed software development life cycle, technical architecture, workflow with agile methodology and kept track of the software development using JIRA</li> <li>Programmed software and web interface for products such as Warranty Claims, Product tracking, Service letters using JavaScript, Java, Python, HTML, CSS</li> <li>Migrated applications to GitHub action for continuous integration and automated 75% of testcases that reduced infrastructure cost by 40%</li> <li>Supported product deployment, testing, and monitoring by debugging production tickets, analyzing client requests, and documenting tickets for future</li> </ul>		
<b>Senior Systems Engineer, Infosys Ltd, Pune, Maharashtra, India</b>		September 2020 – February 2022
<ul style="list-style-type: none"> <li>Increased collaboration with diverse team by providing vital training in resolution of tickets thereby reducing bug intake by 15%, managed 20+ change / service requests and incidents to deliver within time and cost</li> <li>Upgraded around 5-7 custom tile CSS and cross navigation between tiles and wrote JavaScript scripts to build, evaluate and develop real-time UI applications and web connections, resulting in 60% higher customer satisfaction</li> </ul>		
<b>Systems Engineer, Infosys Ltd, Pune, Maharashtra, India</b>		January 2019 – September 2020
<ul style="list-style-type: none"> <li>Developed user engagement analytics strategy, providing first insight into how users interact with custom apps on individual’s tablets and mobile, facilitated technical and bug management thereby increasing efficiency by 40%</li> <li>Documented 7-10 user documentation and scripts for technical usability design and testing, system training and engaged with team to design and implement customized user interfaces</li> </ul>		
<b>Technical Engineer (Tutor), Prayantna (LiveWire) Mumbai, Maharashtra, India</b>		October 2017 – December 2018
<ul style="list-style-type: none"> <li>Coached 50+ undergraduate students and working professionals with software’s MATLAB, CADENCE, CISCO PACKET TRACER, PLC SCADA, CX-ONE that contributed towards achieving career goals and improvement</li> <li>Tutored programming languages java, MATLAB, R and concepts like machine learning and data science, TCP/ IP, Networking fundamentals thereby incorporating skills such as logical thinking, and building algorithms with concepts of both math and technology</li> <li>Completed Internal Certification from LiveWire Software training center in MATLAB programming</li> </ul>		
EDUCATIONAL PROJECTS		
<b>Healthcare management software (Capstone Project), Pace University, NY, United States</b>		January 2024 – May 2024
<ul style="list-style-type: none"> <li>Built healthcare management software using React .JS, Google Cloud Firebase and Visual Studio Code, AWS, and Jenkins, Docker for automating CI/CD pipeline, optimizing operational workflows and enhancing patient care outcomes through strategic implementation</li> <li>Implemented systematic software development following the coding standards software engineering skills, experiencing SDLC phases (design, build, test), logging and code review firsthand in projects, fostering comprehensive understanding and successful project outcomes</li> <li>Acquired multifaceted skills: project planning, risk management, teamwork dynamics, communicative, and technical documentation writing, enhancing proficiency and contributing to project success</li> </ul>		
<b>Artificial Intelligence, Pace University, NY, United States</b>		January 2024 – May 2024
<ul style="list-style-type: none"> <li>Employed heuristic programming for problem-solving; designed intelligent agents with A*, iterative deepening, genetic algorithms</li> <li>Explored machine learning techniques like neural networks, decision trees; understood constraint satisfaction problems, computer vision, language translation</li> </ul>		
<b>Deep Learning Regression Analysis, Pace University, NY, United States</b>		September 2023 – December 2023
<ul style="list-style-type: none"> <li>Performed exploratory data analysis such as data preprocessing, evaluation using TensorFlow and PyTorch on datasets such as Median House Prices from California and Diabetes to uncover various patterns and to find correlation among variables and improve price predictions</li> <li>Developed regression models through analysis and visualization of data using neural network-based algorithms MLP (multi-layer perceptron), linear regression (TF/Kera sequential), DNN (Deep neural network) to improve the predictions, used powerful tools such as TFGV and PyTorch</li> </ul>		
<b>SplitEasy using Mobile and Web Development, Pace University, NY, United States</b>		September 2023 – December 2023

<ul style="list-style-type: none"> <li>Designed and prototyped an Android mobile app for expense splitting using Frontend development React Native and Expo Snack, enabling 50% faster UI iteration compared to native android development</li> <li>Implemented interactive Android UI prototypes with React Native components like Touchable highlights, Scroll View, Image rendering and flexbox layouts, improving UI responsiveness by 30% based on user testing</li> <li>Utilized Expo Snack for rapid prototyping, allowing live previews of the Android app UI on physical devices via QR code</li> <li>Conducted 5 rounds of usability testing sessions with the prototypes to gather feedback and iterate on the Android app’s user experience</li> </ul>	
<b>Parallel Computing, Pace University, NY, United States</b>	September 2023 – December 2023
<ul style="list-style-type: none"> <li>Implemented concepts of Sequential and Parallel Computing to build a program with efficient and faster speed up using concepts such as C*</li> </ul>	
<b>Game Programming, Unreal Engine 4, Pace University, NY, United States</b>	January 2023 – May 2023
<ul style="list-style-type: none"> <li>Created real time applications using Unreal Engine 4 and C++, especially games to translate into workable script language</li> <li>Lead project team of 4 personnel, focused on 3D level design, motion capture and camera angles, character development, rendering and animation in 3D, polygon models, collision detection, and texturing</li> </ul>	
<b>Chess using Algorithms and Computing Theory, Pace University, NY, United States</b>	January 2023 – May 2023
<ul style="list-style-type: none"> <li>Applied key algorithms and data structures including recursion, arrays, linked lists, and sorting algorithms to successfully implement class projects.</li> <li>Demonstrated proficiency in problem-solving and algorithmic thinking</li> <li>Developed a modular Chess game in Python using PyGame library, incorporating the minimax algorithm with alpha-beta pruning for optimal move determination.</li> <li>Employed OOP (Object Oriented Programming) principles and standard software development practices for quality assurance</li> </ul>	
<b>Dental Clinic Software using Java, Pace University, NY, United States</b>	September 2022 – December 2022
<ul style="list-style-type: none"> <li>Gathered requirement analysis, software specification, designed Java Based end-to-end user-friendly web application using NetBeans Java, PHP, APACHE Tomcat Server and MySQL as RDBMS Database for dentist, admin, and receptionist to manage 4-5 functionality such as track patients’ appointments, billing, gather information of patient resulted in automated process</li> </ul>	
<b>Student Event Organization using DBMS, Pace University, NY, United States</b>	September 2022 – December 2022
<ul style="list-style-type: none"> <li>Facilitated web application for “Student Event Organization” where admin can manage and organize events and clubs, manage registration of students for the organization with 5-7 skills as JavaScript, HTML, CSS, Bootstrap, Visual Studio Code, PHP, and MySQL (RDBMS Database) thereby automating the process for students to register for event from web page</li> </ul>	

### TECHNICAL SKILLS

**Programming Languages:** Python, C, C++, SQL, Java, JavaScript, HTML5, CSS3, Bootstrap, PHP, MATLAB, R, Data Structures and Algorithms, Database Management Systems

**Technologies/ Framework:** SAP Fiori, SAP UI Web Ide, React Native, Unreal Engine 4, AWS (Amazon Web Services)

**Developer Tools:** Jupyter Notebook, Visual Studio Code, Postman, Eclipse, JDK IDE, Expo Snack, Google colab

**Operating Systems:** Windows OS, Ubuntu, Linux

**Version Control/ CI-CD:** Git, GitHub, Jenkins, GitHub Actions, Slack

**Methodologies/ Practices:** Agile Methodologies, Scrum, Jira, Kanban, Test Automation /Unit Testing, Functional Testing, Software development Life Cycle (SDLC)

### AWARDS / ACHIVEMENTS

**Certification,** Crossignz Hackathon, HackerRank: Problem Solving Basic, CSS, HTML, Python (Basics), SQL (Basics) March 2023 - Present

INSPIRE (International Student Professional Readiness Education) Certification, **Pace University** September 2022 – May 2024

Involved in Weekend Hackathon (Dataiku), **Pace University, NY** November 2022 – November 2022

**Insta Awards, Infosys Ltd,** Maharashtra, India February 2020 – July 2022
